## **ARCHITECTURAL STRUCTURE SERVICES FOR PRESERVATION OF HUMBLES HALL RFP NO. 0007-FY20-21**

### **PURPOSE OF THE REQUEST**

The Virginia University of Lynchburg (VUL) is seeking proposals for **ARCHITECTURAL STRUCTURE SERVICES CONSULTANT** to provide an architectural survey and Historical Structure Report for the preservation of historic Humbles Hall – Phase II, administrative, academic and cultural arts building located on the VUL campus in Lynchburg. Humbles Hall serves as a primary administrative support and cultural arts facility for the Virginia University of Lynchburg (VUL) campus. Humbles Hall is one of three academic buildings. VUL is a registered Historically Black College and University (HBCU) established in 1888. Humbles Hall was erected in 1921. It is a two-story, brick building structure built on a stone foundation.

VUL applied and received a \$499,713 grant for the preservation of Humbles Hall – Phase II, from the U.S. Department of Interior National Park Service’s Historically Black College and University Grant Program to stabilize and to diminish the most immediate threats, prevent reoccurrence, and allow for better long-range construction planning.

The consultant must have demonstrated successful architectural experience working with historical preservation projects and must abide by the Secretary of Interior Standards for this project.

### **PROJECT DESCRIPTION**

One of three academic buildings, Humbles Hall houses the executive and management offices, an executive conference room, a large capacity lecture hall/auditorium, and campus food service operations.

Humbles Hall is currently undergoing Phase I renovation work described as deferred maintenance, repair, and building renewal projects, that includes repair or replacement of utility distribution systems, HVAC equipment and Electrical services throughout the building. This work will be completed prior to beginning Phase II renovation and restoration work.

Humbles Hall Phase II statement of work includes:

Due to the current Phase I work being completed; the following concerns will need to be addressed in Phase II renovation and restoration work:

The current food storage area will be eliminated. The current floor in the Dining Hall is affected by water intrusion during rain events, on the left side of the Dining Hall (when facing the stage area).

**Main Level: Executive/Management Offices:** the installation of HVAC and Electrical equipment during Phase I will eliminate the current and only bathroom facilities (men and women bathrooms) on this floor. The current conference room meeting space is located in the same space as the building elevator doorway entrance for this level. The emergency exit/doorway on this level is located in the chapel room on this level and is only accessible through the chapel space.

**Second Level: Auditorium/Stage:** there are currently no bathroom facilities located on this level. Phase I renovation and restoration work will include installation of HVAC equipment on the left side of the stage area. The building elevator and ADA accessible entrance to this level is located on the right side of the stage.

**Each Level:** The replacing of floors and finishes as needed is necessary due to Phase I renovations on each level.
